DESCRIPTION OF SARGO (MINOR) 25 OFFSHORE

The boat is built by the reputable Sargo Boats in Finland that was previously called Minor. Also the newer version of this boat is now called Sargo 25. Quality is thekey word for the yard; everything from the hull's solid structure with deep V-bottom and foam-filled hull sides that effectively dampen the sounds, to the equipment of the highest class.

The cozy and well-insulated wheelhouse provides plenty of space for up to 6 people. The bright cabin has visibility almost all around and there is the opportunity to eat, it has a stove and a fridge.
Outside you move safely thanks to the walk-around design with high, protective hull sides. The aft deck is big enough for pleasant stay and, for example, swimming from the bathing platform with a wide, opening gate.
In the bow there is a cabin with a bed for 2 people and a toilet with septic tank.
The Sargo 25 has a powerful Volvo of 260 hp, bow thruster and automatic/manual trim tabs, all of which contribute to the excellent characteristics and maneuverability both at sea and in harbor.
The boat has been upgraded to "Sargo-design" with new original-labels from the manufacturer (several photos below still with the old Minor labels).

The engine is always serviced by authorized Volvo Service.
The boat is sold by the other owner and is in excellent condition.
Winter stored in Dalsbruk, 2.5 hours west from Helsinki / Finland.

Included in the price is that the boat will be delivered serviced and launched in the spring of 2024!

EQUIPMENT
