DESCRIPTION OF FORMULA 350 SUN SPORT

Formula's 350 Sun Sport is sleek and low-slung, a delight on the eyes. Its design prioritizes ride quality, superb handling, and enjoyment both on deck and in the water. Yet it boasts a full galley, a generous head, a large forward berth, and Art Deco decor, all of which ensures weekend luxury for two. The 350 Sun Sport is a boat for those who have learned to appreciate quality.

This model comes in the eye catching Black Onyx colours with lovely leather seating and shiny stainless steel. It is sleek and low at sight, which not only gives an impression of beauty, it also assist in making it an ease to manoeuvre even in windy conditions going in and out of small corners of even tricky ports. Underway, it has a light feel thanks to power-assisted steering, plenty of horsepower, and refined planing surfaces.

Her cockpit is well organised for both a ride in comfort as well as for entertainment, that being in port or at anchorage.

The first test carried out in 2008 tells the full story - [Link to the 2008 test here](#) - the fact, that you can still order a 350 SS tells the story of a winning concept!

The present owner has kept this version in an almost new condition and added a number of upgrades, that makes both ride and comfort even a greater pleasure. The boat has always been kept inside for winter storage. She has been made all ready for the new season and just recently launched.
