DESCRIPTION OF TRISTAN 315 FLYBRIDGE

These quality boats with excellent features are built in Finland by the renowned Tristan Boats.

The well-equipped wheelhouse offers excellent visibility in all directions and has space for the navigator.

Aft to starboard is the practical galley, equipped with a stove including an oven, refrigerator, and sink.

To port, there is a spacious seating area with a large table where the entire crew can sit comfortably and enjoy the views.

In the bow, there is a larger cabin with a wide double berth to port.

In the mid to starboard, there is a smaller cabin that also accommodates a double berth.

The toilet with a shower is located to port.

The boat offers plenty of storage space, cabinets, and drawers for everything needed on a longer holiday.

In the cockpit, you can enjoy the open air or swim from the bathing platform. The platform also provides a convenient and safe way to access the dock when mooring aft.

From the flybridge, there is a fantastic view, and manoeuvring the boat in the harbour is easy. The bow thruster is also a great help in these situations.

This Tristan is in good condition with no groundings or other notable damage.

Winter storage in a warm hall.
