DESCRIPTION OF J-BOATS J-105

The International J-105 is a fixed keel one design racing sailboat. It was the first production boat featuring a retractable bowsprit which allows for an unusually large asymmetrical spinnaker.
It was introduced in 1991 by J-Boat and designed by Rod Johnstone. J-105s are a common sight in one design racing and to date, J-Boats has built 685 J-105s. The J-105 is regarded as a fast design with a clean deck layout. It was selected as the 1992 "Boat of the Year" in the Racer/Cruiser category by Sailing World Magazine.
The concept behind the J/105 line is to produce boats that are fast, strong, fun and easy to sail shorthanded while racing in One Design fleets or while cruising with sprayhood raised, sails furled, and swim ladder swung off the transom.
J-105 has stability, rig and sail controls to handle 15-20 knot winds without the need of reefing. It has the strength and seaworthiness for oceangoing passages.
This boat has just been launched and is ready for immediately hand over for a new owner to enjoy the full sailing season.
Contact responsible broker Lars Legarth for further information and for an appointment to see the boat. The seller is open to bids.

J-105 DKK 440.000 From 2001
