DESCRIPTION OF STOREBRO 355 BALTIC

Launched in 1995, the 355 Baltic quickly became popular with boat owners looking for value, comfort and durability.

Based on the concept of the previous SRC 31 model, a simpler, more comfortable and more flexible model has been created. The 355 has an elegant development of the ship in the foredeck and the curved window in the deck saloon were the new features.

This flybridge version provides perfect visibility and seating when cruising or manoeuvring at the quay, manufactured in the high classic Storebro quality, well maintained and equipped with two Volvo engines. With a length of just over 10 meters, the boat offers a spacious interior with modern amenities, making it suitable for longer trips.

The boat's layout, with two cabins at opposite ends, each with its own bathroom, is perfect for a family or with guests. The galley is spacious and well-organized, and the saloon with sofa and side tables offers plenty of space and 360-degree views.

The aft deck is raised, complete with a full and safe guard rail. The comfortable helm station is well equipped for navigating in all weather conditions.
