DESCRIPTION OF BALTIC YACHTS 40

Baltic 40 (1988)
A thoroughly updated premium cruiser with three owners since new, fully serviced according to schedule and winter-stored in a heated hall. Homeport Kokkola, Finland.

Introduction
The Baltic 40 is a renowned premium cruiser from the legendary shipyard Baltic Yachts Ab, built to the designs of Judel/Vrolijk & Co. The design office is widely recognized for engineering stiff, well-balanced hulls with excellent sailing characteristics, which on this model are combined with Baltic Yachts' traditional build quality and high-end interior joinery in hand-selected teak.

This particular yacht has had only three owners from new, has been meticulously serviced according to schedule, and has always been wintered inside a heated storage facility. The vessel is located in Kokkola, Finland, and is offered for sale through Båtagent with the seller retaining the right of free discretion regarding final offers.

Maintenance & Updates
For a buyer seeking a yacht in this segment, this Baltic 40 offers substantial financial and practical peace of mind, as the most extensive and costly maintenance items common for the model have already been professionally completed:

Deck & Hull: The teak deck and cockpit teak were completely renewed in 2014. All hull and superstructure ports/windows were replaced in 2024.

Engine & Drivetrain: The original Yanmar engine has been replaced with a modern Volvo Penta D2-40F (2018), currently showing under 300 running hours. The shaft seal was replaced in 2026.

Structure & Rigging: A complete structural overhaul and inspection of the keel and keel attachment was carried out in 2026. The rig's spreaders and all running rigging/halyards were renewed in 2023.

Thanks to these comprehensive updates to the hull, structure, deck, and machinery, this yacht is delivered ready for her next owners without any anticipated need for major structural or mechanical investments in the coming years.
