DESCRIPTION OF FINNMASTER PILOT 8

Are you looking for an all-weather, multi-purpose family boat? On offer is a modern, well-maintained, and low-hour "SUV of the seas," designed for those who appreciate quality, versatility, and the chance to truly enjoy an extended boating season. The sporty Finnmaster Pilot 8 is ideal for family holidays, commuting, and fishing alike.

Why choose the Finnmaster Pilot 8?

True year-round capability: The weather-protected, bright cabin offers great visibility and protection from both heat and rain. A large sunroof and opening doors ensure comfort even on hot summer days.

Space for the whole family: The boat sleeps up to 4+2 people and features a separate spacious head with a shower, as well as a fully equipped galley (stove, fridge, sink).

Safe and agile handling: Wide side decks and a dedicated skipper's side door allow for effortless handling, even with a small crew or solo.

Convertible cockpit: The open aft deck provides an enjoyable outdoor space for morning coffee or socializing, and the entire area can be enclosed with covers if needed. The aft deck is also perfect for fishing.

The boat has just been serviced (spring 2026) and is now launched in the water in Helsinki.

Feel free to get in touch if you would like more information or want to come and see the boat on site.
