DESCRIPTION OF TARGA 37

A well-equipped Targa 37 Flybridge with only approximately 400 engine hours, one owner since new, and always stored in a heated indoor facility during the winter.

The Targa 37 is one of the most appreciated models from Botnia Marin and a popular choice for boat owners who value seaworthiness, safety, and comfort. The model is known for its robust construction, wide side decks, and reliable handling characteristics, even in demanding conditions.

The deep-V hull provides a smooth and stable ride, while the protected wheelhouse and flybridge configuration make the boat suitable for both archipelago cruising and longer passages. With two separate cabins, generous social spaces, and a practical layout, the Targa 37 offers comfortable accommodation for family and guests.

This particular boat has had only one owner since new and has been used sparingly. The engines have only approximately 400 operating hours. During the winter season, the boat has always been stored in a heated indoor facility, helping to preserve the hull, interior, and electronics in very good condition.

Technical Information
Dimensions and Capacities
Length: 12.75 m
Beam: 3.51 m
Country of Registration: Finland
Fuel Capacity: 1,400 litres (2 × 700 litres)
Fresh Water Tank: 150 litres
Water Heater: 30 litres
Holding Tank: 90 litres
Engines
2 × Volvo Penta D6-370
