DESCRIPTION OF SARGO (MINOR) 28

"The handling isn't much to talk about: it's good. Very good". That's what Båtnytt wrote in its test of the Minor 28, which was later renamed the Sargo 28. This is a boat that, from the drawing board to the finished boat, is built to withstand rough seas and transport its crew comfortably and safely to their destination, whatever the weather conditions. The hull is V-shaped and provides a comfortable ride. The boat is powered by a powerful 370 horsepower 6-cylinder Penta which, along with common rail fuel injection, twin overhead camshafts and turbochargers, contributes to outstanding torque with low fuel consumption.

The boat is comfortable to live in with two separate cabins with double berths. There is also a relatively spacious toilet below deck and some storage space. In addition to the steering, the cockpit accommodates a sofa with table and a galley with stove, hob and refrigerator. A generous roof hatch can be opened to let in the sun when the weather permits. In terms of equipment, there is everything you could wish for in the form of a heater, hot water, toilet with septic tank and similar comfort equipment. Furthermore, the boat is equipped with modern navigation instruments, anchor winch in the stern, bow thruster and much more to make life on board easy and safe.

In summary, a superb opportunity to acquire a modern boat with high living comfort built to face the toughest conditions at sea!

FACTS

Length: 9,20 m

Beam: 2,98 m

Weight: 4,200 kg
