DESCRIPTION OF SAARE 38

A beautiful Saare 38 from 2013. A very comfortable boat, built by the well-known Saare shipyard in Estonia. The shipyard has a lot of experience in building quality boats, including hundreds of the also very successful Finngulf boats.

The Saare is a hand-built sailing boat of the highest quality, combining modern lines with traditional values. It is the perfect boat for those looking for a fast and comfortable boat that not only has optimal sailing characteristics but is also easy to handle. Moreover, this is the ideal boat for longer stays and excursions.

The living area below deck is cleverly thought out. There are two spacious cabins with room for a total of 4 people. One is in the bow and one in the stern of the boat. The saloon with two long sofas, on which a larger group can sit comfortably, offers plenty of space and a pleasant atmosphere. In the L-shaped galley you will find a gas oven with cooker, a large cool box and plenty of storage space. To starboard is the chart table and navigation area.

In addition, the boat has a separate, very practical and spacious "storage cabin" for equipment. A fast and easy to sailboat where every detail has been thought through to make your stay on board as comfortable as possible. This example is practically in "new condition", well maintained, very well equipped and with many intelligent solutions. A boat for those who want to concentrate 100% on the beauty of being at sea.
