DESCRIPTION OF FAURBY 393

Faurby has been building sailboats since 1976. The yard started with the building of the Faurby 999 according to the IOR rules, but then moved away from building according to class rules to build the boats only according to speed and comfort. The boats from the Faurby yard in Skœrbœk were and are still being built according to traditional craftsmanship with sailing characteristics and comfort at the forefront. An ey to every detail!

Faurby 393 was first launched in 1987 and is an incredibly beautiful, well-built fast and comfortable sailboat designed by designer Niels Peter Faurby.

This incredibly beautiful 393 from 1990 is now on offer by its second owner, who over the last 20 years has continuously updated and maintained the boat well, the major changes of which have been made by the Faurby yard in Skœrbœk.

The boat is under its current ownership rebuilt from tiller steering wheel control, has had the engine changed (20139, foresail furler, Ronstan/Frederiksen batten system, anchor windlass, approved life raft, electric toilet with holding tank and tank meters, Lithium batteries, radar on radar mast aft, upgraded navigation equipment, LED everywhere and much more. See the detailed equipment list in pdf above for more information.

The boat is with two good cabins, each with its own large double berth, beautiful saloon with comfortable alcantara cushions, well-equipped pantry, large navigation/work table and toilet/bath. Everywhere you wil find lots of easily accessible stowage space!

If you appreciate fast cruising above the average, and appreciate boatbuilder work of the absolute top class, then here is one of the better examples of the kind. One of the rare items on the shelf.

Please contact the responsible broker for further information or to arrange a time to inspect this beautiful lady.
