DESCRIPTION OF NORD WEST 355

A well cared for and updated Nord West 355 Flybridge including new plotter, inside and out, and Efoy fuel cell for a problem-free power supply. New large cushions on flybridge and aft deck, fridge and cooler for proper storage and other equipment to make life on board as comfortable as possible. The boat is equipped with two Volvo Penta KAD 44s, the perfect engines for this boat. Cruising speed of about 23-27 knots and a maximum speed of over 30 knots. A boat that levels out well.

This model has a very nice and well-planned interior, from the driver's seat you have full control of the boat, and all its instruments and controls are in the right position both inside and on the flybridge. From the spacious aft deck, one enters a saloon which is at the same height as the aft deck. To starboard there is a galley with good storage and to port a nice settee with a table and seating for the whole crew. These can be turned into extra berths. Half a flight of stairs down to port is a substantial mid-cabin. To starboard a toilet, with deck drain of course. In the bow a large double berth. Just like many of our Scandinavian boats, this one has plenty of good storage room. Many lockers and wardrobes for clothes and other spaces for bigger items.

A Nord West 355 is suitable for longer stays on board. A boat that will take you safely across the seas or just out to your favourite bay.

FACTS
