DESCRIPTION OF SEALINE 35 SC

Sealine 35 SC is a well thought out model with huge space and volume in relation to its length. The hull is designed by Ocke Mannerfeldt who successfully has created a hull that gives both high level of comfort on board but at the same time good driving performance on calm sea as well as bumpy waves. Below deck, the boat contains two cabins and one bathroom with a separate shower, a well-equipped kitchen and a spacious saloon. In the forward cabin, two people can sleep comfortably and in the midship cabin there is room for two or three persons. The cockpit is design for high comfort under the "hardtop" which is simply folded into open the entire roof during sunny summer days. From the driver's seat you have great visibility at all angles. Once you are moored you can enjoy the huge swim platform in the stern for sun bathing and swimming.

This boat has been well taken care of and has always been maintained by Penta authorized yards and stored indoors since the boat was new. The boat is equipped with Volvo Penta's joystick control which makes it easy to maneuver in limited space. The system is similar to Penta's IPS drives, but with this propulsion system you avoid the expensive service costs the IPS drives. Furthermore, the boat has been equipped with a new heater, Garmin 12" plotter, electrical anchor windlass in the stern and a new coocpit cover.
