## DESCRIPTION OF NORD WEST 410

---

Nord West 410 is a large 41-footer of the highest quality. The volume down below is such that all areas are really spacious. The hull provides really good sea-keeping qualities at all speeds. The owner's stateroom forward is both really spacious and inviting and the guest cabin aft does not trail far behind. The galley has space and volume that rivals that of a kitchen ashore.

Nord West 410 is a proper yacht, finish and style is of the highest quality. The model was successfully manufactured during a relatively long time, which indicates a very successful design. In 2001, the Nord West 410 was replaced in the Nord West range by the Nord West 420. This 410, built in 2000, is among the last to leave the yard and as many times before the last of a model are usually the best.

This example has the most powerful engines, the Volvo Penta TAMD 74P times two, for a total of 960 Hp, giving a top-speed of 34 knots. Thanks to the installation with shaft-drive and rudders, the boat is equally happy pottering along at 7 knots on a sunny day in the archipelago. Just the sound of the engines inspire confidence.

The third owner is now selling. The first owner only had the boat a short time, before the Nord West yard sold her on to the second owner. The boat has been maintained by Vindö Marin, stored indoors in heated storage. An opportunity to acquire what is by now a classic yacht from Nord West.

Exemple of equipment, the full list (in Swedish partially) can be found by following the link "utrustningslista" above:

Windlass both forward and aft, remote control

Simrad autopilot

Furuno Radar, 10" screen
