A boat with a seldom-seen list of equipment, extremely well maintained and ready to carry you across the seven seas and to those remote destinations. The boat is registered in the Swedish Maritime Registry, has only had two owners and never been chartered – her history is fully documented.

The boat was designed by naval architect Phillippe Briand and this may well be one of his most successful designs.

There are three cabins, with the forward cabin having its own washroom. The two stern cabins – also with a separate washroom – can easily be transformed into a huge owner's cabin.

The chart table, or rather the chart office, is entirely unique and a study in style when comes to smart and creative solutions. The fantastic navigation chair is perfect for both longer cruises and everyday use.

With the spacious galley – featuring a microwave oven, 4-burner stove/grill/oven, refrigerator, freezer, large work surfaces, plenty of cabinets as well as hot and cold running water – cooking onboard is a pleasure. The layout of the lounge – also with ample storage space – makes for a very pleasant environment, perfect for relaxation with companions.

The 110 HP engine is a turbo-charged Yanmar with a Gori two-geared propeller. The boat is also equipped with dual Webasto heaters, a life raft, solar panels, bow thruster, cockpit canopy, isolation transformers and a fully refurbished sail wardrobe – just to mention a few items on the list of equipment.

Winter storage, indoors and heated, is available as well as a slip for the summer months.

GENERAL SPECIFICATIONS
Hull length:14.75
Beam: 4.49
Keel draught: 2.15
Displacement: 12,650 kg
Keel weight: 3,750 kg
