DESCRIPTION OF NAJAD 441

Characteristic for a Najad 441 is the large, smooth teak deck, which gives the yacht its classic lines and also makes it easy and safe to move around and work on the yacht. The cockpit is spacious and protected by a tempered glass windshield in combination with a spray hood that folds down flat when not in use. The hull and the keel has a aerodynamisk design that provides good sailing performance both for inshore and offshore sailing. A very safe ocean sailing yacht. Inside, there are good areas and a woodwork at the highest quality. This is a boat to love. The yacht is sold with some surface treatment that should be improved.
