

Finngulf 33, 2005

Location: Helsingfors / Helsinki

Price: 92 000 € (686 021 DKK)

A lovely "high performance cruiser" for the demanding buyer. This is the boat that combines real beauty with a penchant for performance. Finngulf is the answer for those looking for a compact, well-sailed and easy to maneuver 33-footer, with a taste for both pleasant sailing, but maybe also racing.

DESCRIPTION OF FINNGULF 33

Finngulf Yachts has produced a total of around 900 boats between the years 1981 and 2011. The boats are handmade and compromise neither quality nor good sailing performance. The Finngulf 33 is offshore capable and with excellent sailing characteristics makes it a very suitable boat for a smaller family or crew. The boat feels smooth and safe to sail and maneuver in most conditions. All control lines are accessible from the cockpit that is planned for the most convenient sailing as possible, even for a solo sailor.

The interior is designed to be both beautiful, but also functional out at sea. The salon provides good light penetration. To port of the companion way steps is an L-style pantry, with plenty of storage, stove, oven and fridge. The aft- and forecabin have a double berth and wardrobe. The salon has two settees, which also provides berths for two and in addition a table with folding leafs. On starboard side there is a toilet with a shower. Simply; here is everything you need for nice, comfortable sailing.

Is it a recognized fast sailing quality boat you are looking for, you want a little of everything in compact and handy size, then this beauty may be the boat you are looking for!

This Finngulf 33 is in excellent condition and has no grounding or other damage. It has a lot of updates made over the years, now sold by the third owner.

The boat is located in Helsinki / Finland.

Included in the price is that the boat will be delivered serviced and launched in the spring of 2024!
