DESCRIPTION OF NIMBUS 365 COUPE

Indoors you have a spacious and well-equipped galley to starboard and the ergonomic driver's place in front. To port a large, lowerable table with sofa and place for a bigger crew. Large windows and the openable glass hatch in the roof provide lots of light and space in the salon as well as excellent visibility in all directions. Here the whole crew thrives regardless of the season!

The large aft deck has also a lovely seating area with table and can be covered with a cockpit tent if the weather so requires. In the stern there is a large bathing platform that is easily reached from the cockpit and also works great as a ramp to the jetty.

On the foredeck there is the possibility of sunbathing on large mattresses.

The boat has a wider walk-around passage to starboard for convenient and safe passage and a narrower to port, smart solution also this.

This Nimbus 365 has twin Volvo Penta engines for greater safety and provides a cruising speed of just over 20 knots and top speed of almost 30 knots.

For easy manoeuvring in port, both bow and stern thrusters are available.

The boat is in very good condition and extremely well equipped, winter stored in a warm hall.

The engines are regularly serviced by authorized Volvo Service.

Included in the price is that the boat will be delivered serviced and launched in the spring of 2024!

The Nimbus 365 Coupe' was voted "European Powerboat of the Year" in 2012 and is still in production with only minor updates, a clear proof of how successful this design is!
