DESCRIPTION OF CELESTE 36

Comments from the current owner:

The first owner realised his dream of building a one-off boat with inspiration from Herreshoff traditional yachts from the early 1900s and more modern American boats from J-Boats and Lyman-Morse. We, the second owner, got to take over a piece of jewellery that had been carefully sailed out of Marstrand and never had an overnight stay. We have enjoyed every second as owners of Linnea, during two-hour short sails, during three weeks along the Bohus coast and with ten people in the cockpit and a party in Marstrand. Linnea offers true sailing pleasure, safety, a large cockpit, living comfort, smart and luxurious solutions in stylish packaging. Expressed in car terms, she is a gran turismo. Whether we are in a natural harbour in the archipelago, in Fjällbacka or in Skagen, we get questions about the boat and must invite the most curious on board. If you want to own a unique boat that attracts attention, delivers first-class sailing experience and quality feeling, and which is in great condition, then this is your opportunity. All at a cost that is less than a third of the new build cost.

A video will be published during this week.
