DESCRIPTION OF HANSE 370E

Hanse 370E:

Sailboat from 2007! Here you will find a boat that combines sailing with a comfortable and functional layout, making it an ideal leisure boat and a place to live. The boat has 3 cabins. Hanse 370E is built with epoxy. This means that you get a stiffer and lighter hull. Easy ownership and don't have to worry about moisture damage in the hull.

Layout:

Hanse 370E offers a spacious and comfortable interior with three cabins. The generous saloon area provides plenty of space for family and friends to enjoy sailing trips and vacation time together. The clever layout in the cockpit creates an inviting atmosphere for relaxation and socializing. Whether you want to bask in the sun or sit in the shade, there is a cockpit canopy that can be raised to provide protection from the wind or mosquitoes.

Easy Sailing:

Sail with ease aboard the Hanse 370E. The boat is designed for simplicity and user-friendliness. With a self-tacking jib on a furling system and sheets led to the cockpit, sailing becomes smooth and intuitive. You can easily handle the boat alone or with a smaller crew. The well-positioned steering and comfortable controls make sailing a joy.

Shallow Keel:

Hanse 370E is equipped with a shoal keel, which allows you to sail and explore natural harbors with shallow waters. With a draft of only 1.6 meters, you have access to beautiful places and ports that may otherwise be inaccessible for deeper boats. This provides you with the flexibility to choose your destinations and explore areas that you might otherwise miss, like Eurorpan channel system.
