DESCRIPTION OF AQUADOR 28 DC

It is stylish and practical, works just as well with the cockpit open in nicer weather as with the cockpit canopy closed in poorer conditions.

Inside, there is a larger cabin in the front where the table can be lowered to form a comfortable, large V-berth. To starboard is a smaller cabin with a wide double berth.

The spacious toilet with shower facilities is located on the port.

The well-equipped steering position has excellent visibility in all directions and has also space for the navigator.

Along the port side is the practical galley with both stove, fridge and sink.

The large seating area has room for a larger group, allowing you to enjoy under the open sky or protected by the canopy in bad weather. The table can be lowered and converted into a spacious double berth, or a perfect place for lovely sunbathing.

The boat has plenty of storage space, lockers and drawers for everything needed on a longer journey.

The powerful Mercruiser diesel engine provides plenty of speed resources and the bow thruster makes port manoeuvres significantly easier and safer.

The boat is in good condition, sold by the second owner and has only 368 hours engine hours.
